

PUBLIC NOTICE

WATER SUPPLY SYSTEM COVERED BY THIS NOTICE

Stewart Community Water System

To ensure that the District of Stewart maintains the best possible quality of water, Public Works will continue with the next step of annual maintenance of the Water System.

The annual maintenance program of the District's water system is mandated by Northern Health and adherence to the requirements of the annual maintenance program will help to prevent future permanent chlorination.

During the annual maintenance, Public Works will be adding carefully measured amounts of a hypochlorite solution to Stewart's water storage reservoir, and it will then travel through the District distribution pipes. All the hypochlorite solution will be flushed from the lines within a couple of weeks.

System maintenance will begin no earlier than September 08, 2025 and Notice of the commencement date will be posted online and on District posting boards.
