

# PUBLIC NOTICE

## Disposable Wipes

### **Disposable Wipes Are Not Flushable!**

For your benefit and the benefit of all sanitary sewer users in our community, be careful what you flush.

Newer styles of disposable wipes *claim* to be flushable as they are made of a fibrous material like toilet paper, but all wipes clog the sewer as they tend to twist together in the pipes and create obstructions.

Please DO NOT flush the following items as they can cause blockages:

- disposable hand towels
- baby wipes
- cosmetic and surface wipes
- feminine products

If you are not sure, please throw them in the trash. A clogged sewer line on your property may cost you a significant amount to repair and the District has no obligation to repair blockages beyond the property line.

**\* Please do not flush disposable wipes \***
